Reason(s) for Change: Supply chain shortages have made it more difficult to procure the necessary raw materials to build the parts on time.

Description of Change: In an effort to mitigate the risk associated with the global supply chain shortage, the diode within the products listed above has been modified to accommodate a broader set of raw materials thereby improving the stability of the supply chain. The impact of the change is that the voltage changed from 1.24V to 1.25V.
