6 Procedure

6.1 Substances with Restricted Use

The following paragraph identify the restrictions for use of certain materials, in general as well as for specifically defined uses. Chemicals and substances shall not be used in materials, parts or products supplied to Bel Power Solutions above the Maximum Concentration Value (MCV) indicated. The MCV shall be of the homogenous material, unless otherwise specified. Refer to paragraph 4 for a detailed list of materials by chemical/industrial name and CAS number when applicable.

6.2 Substances require to be reported

The materials listed in table 2, while not yet banned, are substances “of interest” to various regulatory and industry organizations. These substances must be reported when concentrations exceed the Threshold Reporting Level. The Threshold Reporting Level shall be of the entire assembly. Refer to paragraph 4 for a detailed list of materials by chemical/industrial name and CAS number when applicable.

Ancillary materials that may be delivered to a Bel Power Solutions customer along with the product include shipping boxes, cushioning (i.e., bubble wrap), labels, environmental control/monitoring (i.e., desiccant, humidity indicator cards), tape, carrier trays, straps, etc. All such material must comply with the substance restrictions defined in Table 2. They are also subject to the material reporting requirements. For detail requirements regarding packaging please see also paragraph 3.4

6.3 Exemption

In some cases, the use of prohibited/restricted substances is allowed under specific circumstances and/or for specific time frames. Per RoHS legislation, lead (Pb), cadmium (Cd) and mercury (Hg) content may exceed the MCV threshold under the specific circumstances. For current list of exemption please see [Annex III of RoHS directive 2011/65/EU](#)

6.4 Requirements for packaging

Requirements specified in this section apply to all packaging used for selling or shipping BPS product:

- All homogeneous materials used in packaging must comply with “heavy metals” restrictions. The sum concentration of lead, hexavalent chromium, cadmium, and mercury must not exceed 100 parts per million (0.0100%) by weight in any single homogeneous material.
- Other substance restrictions that apply to packaging are contained in Section 3.2
- Exemptions from substance restrictions available under EU RoHS Directive are not applicable to EU Packaging Directive
- All materials used in packaging must be recyclable, and must be labeled for recycling, according to applicable ISO, DIN, and country-specific requirements
- Country-specific labeling must meet requirements for Japan, Korea, Taiwan, and China, where applicable.
- Chlorofluorocarbons (CFCs) and hydrochlorofluorocarbons (HCFCs) must not be used in or for the manufacturing of plastic foam packaging materials (for example as a foam blowing agent).
- Methyl bromide sterilization must not be used on wood packaging.
- Elemental chlorine shall not be used as a bleaching agent to bleach virgin or recovered content fiber used in paper-based packaging.

6.5 Custom product and industry specific requirements.

In addition to the requirements mention in point 6.1 and 6.2 BPS product need to meet following requirements if agreed prior design:

- Product designed for automotive industry need to meet requirements defined in [GADSL](#)
- Product designed for railway industry need to meet requirements defined in [RISL](#)
- Product designed according to customer specification need to follow any requirements provided by customer prior design
