These component power supplies are intended exclusively for inclusion within other equipment. The units are considered Class I and must be connected to a reliable earth grounding system. Protection against electric shock and Electromagnetic Compatibility (EMC) must be checked when the equipment is built-in a completed product or forms a part of a complete system.

An additional delta evaluation of the above-listed equipment concerning the differences between the requirements of the harmonized standard EN 62368-1:2014 (with all applicable corrections) and EN IEC 62368-1:2024, and IEC 62368-1:2023 has been performed and concludes that the safety objectives of the low-voltage targets (2014/35/EU) are met.
